Oak Leaf

Oak Leaf's mission is to improve
the supply of packaging for
alcoholic beverages in Eastern Canada.

We are committed to fulfilling our mission by providing producers with an accessible, reliable and high quality service as well as a wide range of bottles, closures and capsules that meet the tastes of today's consumers.

Oak Leaf's assistance from bottle selection through delivery, and its availability to answer customer questions.

SPARKLING BOTTLES

The characteristics

The important role of carbon content in your bottles

*Approx. BAR room temperature 20°C

❶ How temperature variations affect bottle pressure resistance

Temperature variations affect capacity of your bottle to withstand the pressure of the gas introduced in particular during :

❷ Factors not to be neglected

Along with the temperature, various factors related to your drink will influence the resistance of your bottle:

- filling level
- sugar content
- alcohol content
- degree of carbonation (g/l)

	Bar		
	4	**9**	**15**
50 °C	5	12	30
40°C	3	10	22
30°C	2.5	8	15
20°C	2	5.5	10

CO_2 (g/L)

❸ Which bottle to choose ?

Choosing your bottle is essential.
The above elements will help you decide on :

Weight : A heavier bottle can withstand more pressure.

Height : A shorter bottle will withstand more pressure.

THE CORKS

NATURAL CORKS

WHY NATURAL CORK STOPPERS ?

+ 14 millions
TONNES OF CO2 RETAINED

With more than 2.2 million hectares, cork oak forests retain and contribute to the regulation of the water cycle, soil protection and carbon sequestration.

100 %
BIODEGRADABLE AND RECYCLABLE

Natural cork has a net zero carbon footprint, and they are produced without additives.

88 %
OF THE BEST WINES SOLD

Market studies highlight that consumers perceive natural cork as a premium product.

SUPPORT FOR BIODIVERSITY

Cork forests are home to more than 200 animal species and 135 plant species.
This ecosystem requires controlled harvesting and involves a sustainable regeneration process without cutting down trees.

340 000
TONNES OF CORK/YEAR

Globally, 60% of wines use cork closures.

SUSTAINABLE PRODUCTION

Cork forests are expected to meet market demand for the next 100 years, with the largest growing in Portugal.

Visual Quality

Several sizes available :
38 x 24 mm - 45 x 24 mm - 49 x 24 mm and more

QUALITY	EXAMPLES OF HEADS	EXAMPLES OF BODIES
Extra 3 years		
Flor 5 years		
Prestige 8 years		
Nectar 10 years and +		

Custom branding available for orders of 1000 corks or more.

- Top and bottom
- Body of the cork

(fire or stamp)

Delivery lead time :
Availability in Montreal: 8 to 10 weeks depending on arrivals.
Delivery by plane: 4 to 5 weeks.

THE OM SERIES

Micro-agglomerated corks

SUPERCRITICAL CO2 CLEANING

0% RISK OF TCA

- Eliminates the risk of contamination such as cork taint.
- Careful selection of raw material (cork granules).
- State-of-the-art cleaning system.
- TCA levels below the quantification threshold detectable by modern chromatography equipment.

INDIVIDUAL MOULDING

Guarantees better bottling and a stable oxygen transmission rate.

CHOOSE ACCORDING TO YOUR NEEDS

Several ranges available

With different porosities to suit different wines.
*Oxygen Transmission Rate **(OTR)**

Adapts to all types of wine.
From young wines to wines intended for long-term ageing.

	OM **	OM+	OMMAX

FROLIGHT

Frolight - Features

Protect your vines against seasonal frost

Frolight harnesses the power of infrared light tubes to deliver targeted radiant heat directly to your valuable vines. Say goodbye to the threat of spring frost damaging your harvest. Our innovative system ensures optimal conditions, safeguarding your vineyard and maximizing yields.

Automatic system

- Automated operation from a predefined temperature.
- Avoid work -intensive nights.

Simple and precise system

- Even distribution of infrared modules.
- Convenient monitoring via mobile app.

Efficient system

- Infrared heat transfer up to + 6 °C.
- No energy loss in rain or wind.

System in harmony with the environment

- No noise or odor pollution for local residents.
- No CO_2 emission.
